3. Submit shop drawings with the manufacturer's catalog demonstrating weight and other required data.

1.3 Refer to the Specifications for number of submittal copies required.

2. Construction Joint Locations: No horizontal construction joints are anticipated.

4.3 Factored Design Forces/Reactions: As shown on the Structural Drawings.

4.2 Welded Connections: Prequalified welded joints in accordance with AISC NB-21.1.0.1.

4.4 Steel connections not specifically detailed in the Structural Drawings shall be designed by the Contractor. This design service shall be required by other portions of the Contract Documents. Such systems shall be designed, furnished, and installed as noted, unless approved in writing by Structural Engineer.

2.5 Bolts: 1/2" Diameter A325 minimum. The following connections are slip-critical.

2.3 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

6. Coordinate installation with other trades.

2.1 Strip vegetation and topsoil.

1.2 kickoff meeting will be set.

2.2 Permanent water lines not to be disturbed.

1.1 kickoff meeting will be set.

5. Shop Drawings: Submittal shall adequately depict structural members and connections for load values with threads included in the shear plane.

6. Submit written construction procedures prior to the start of masonry construction.

5.  System structural design shall adequately support the medical equipment, including equipment and building finishes, and associated items.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

3.  System structural design shall adequately support the medical equipment, including equipment and building finishes, and associated items.

4.6 Contractor has sole responsibility for jobsite safety and complying with occupational safety and health laws and regulations.

2.7 Masonry reinforcing steel: Place in the center of CMU cells unless approved in writing by Structural Engineer.

2.6 Handrails, curtain wall/window wall systems, precast concrete wall panels, concrete masonry units and accessories, etc., shall be designed, furnished, and installed in accordance with the Architectural Drawings.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.9 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.

2.8 Masonry reinforcing steel: Place in the center of CMU cells unless noted, unless approved in writing by Structural Engineer.
